Lewis Machine & Tool Announces new DMR Buttstock

Lewis Machine & Tool Company (LMT®), an Illinois based company that designs, prototypes and manufactures small arms, accessories and tooling components for the military, government, law enforcement, commercial manufacturers and responsible civilians is proud to release their newest accessory for the Designated Marksman.

The DMR buttstock offers the user customization that the designated marksman requires by including features already known on the LMT SOPMOD. This DMR buttstock fits Mil-Spec carbine extension tube rifles in both the 5.56 and .308 platforms. This newest accessory includes 0.725" adjustable SOPMOD style cheek rest height, 1.25" adjustable length of pull with SOPMOD buttpad for reduced felt recoil and a concealed Mil-Std 1913 STANAG 4694 compliant rail for mono-pod attachment. "Our customers have asked for a high quality adjustable buttstock to match to their Designated Marksman Rifle. We designed this product with those customers in mind", said Karl Lewis, President of LMT®. The DMR was designed to be able to replace current adjustable stocks in less than twenty seconds with no special tools. Kits are also available for those rifles that are looking to convert to six position adjustable carbine extension tubes. The DMR is currently available at LMTDefense.com or your local gun dealer.

About Lewis Machine & Tool Company

Lewis Machine & Tool Company is an ISO 9001:2008 certified company and GSA supplier since 2005. The company was founded in 1980 in Milan, Illinois with the mission of designing and producing the highest quality products for the military and government agencies. LMT® is known for its Monolithic Rail Platform and provides customers with the highest standards in design, engineering and quality assurance in everything they manufacture.
