## For Immediate Release

### THE LEWIS MACHINE & TOOL SHARPSHOOTER SYSTEM– THE ALL-AMERICAN COMMERCIAL MODEL

*The LMT® LM308MWS Sharpshooter System is the American Version of the UK Ministry of Defence's 7.62mm Semi-Auto L129A1 "Sharpshooter" Rifle.*

**MILAN, IL (April 2012)** – [Lewis Machine & Tool Company](#) (LMT®), an Illinois-based company that designs, prototypes and manufactures small arms, accessories and tooling components for the military, government, law enforcement, commercial manufacturers and responsible civilians, awarded the UK Ministry of Defence requirement for a new sharpshooter rifle in late 2009 has now introduced an American commercial version. The UK "L129A1" 7.62mm semi-automatic "sharpshooter" rifle was chosen based on its proven design and new features that made the rifle more accurate over longer distances. Now, for a limited time only, the newly American designated LM308MWS [Sharpshooter System](#) will be available in limited quantities.

The new Sharpshooter System, like its UK predecessor, is built on a one-piece upper receiver with a free floating 16" stainless steel, tactically flat-matte blackened barrel with a 1:11.25" twist with the SureFire adapter mounted. The .308 Modular Weapon System features Flat Dark Earth furniture, a semi-auto carrier group, charging handle assembly, SOPMOD buttstock, two-stage trigger, an ambi-selector and ambi- mag release and flip-up front and rear sights.

-more-

LMT® packs this collector's rifle in a Pelican case with foam cut outs and includes not only the manual, torque wrench/driver and three Flat Dark Earth rail panels, but also eight 20-round magazines, two heavy-duty push-button swivels, a .308 OTIS cleaning kit, a sliding sling mount, a chamber cleaning rod and sight adjustment tool and a Harris Bipod assembly. A complete, one-of-a-kind Sharpshooter System in one package is available for only \$4,950.09 MSRP.
